

Planning Technologists Limited

Planning Technologists Ltd was formed over 15 years ago and operates both in the UK and overseas. Whilst the projects worked on have been diverse, PTL's broad planning knowledge and detailed execution have been applied to all projects with consistent success.

We are equipped with not only the software but also the expertise to prepare or help you prepare the necessary plans to bring your Project to a timely completion within the budget constraints imposed.

We have provided services to many clients, large and small and pride ourselves that each and every client benefits from the same professional service. Whether your company wants to launch a new product or service or develop an existing design, it makes good sense to establish:

- A clear plan of what you want to do
- By when you want it completed
- Who you want to do the work *and*
- How much it will cost
- Cost & schedule optimisation

We can provide the people and software/hardware to perform this service.

For quick summaries of the wide range of experience and types of project, our clients and about this site, read the following sections:

Consultancy

PTL's long experience can be tapped to provide just the input you need to a project. This may be a short study to identify your requirements or to develop alternative proposals for your project development. It might be a training exercise to train some of your staff in the methods and techniques they need to manage and complete a project. It could be a documentation project requiring expertise to create customised documentation on paper or on-line for your Intranet or your website. Or it might be a full-time interim management or contracting role to provide an essential resource.

In any case you can call upon the experience of PTL and its associates:

Experience

Fields of Experience include: -

- Rail Projects
- Gas Gathering and Sweetening plants
- Medical (Cardio Vascular) projects
- Subsea Oil production projects
- Air Separation plants
- Pipelines (both on and offshore)
- Fine Chemical plants
- Polyethylene plants
- Offshore Oil Production Platforms
- Formulation of Schedule Proposals
- Schedule Risk Analysis
- Client Representation on all Project Control matters.

Studies & Proposals

PTL has extensive experience in:

- Studies for project development
- Proposals for different approaches
- Software selection
- Training needs analysis
- Board level presentations

Planning Management

PTL has extensive experience in:

- Establishing project teams
- Establishing project management framework
- Reporting systems
- Documentation standards/controls
- Formulation of Project Plans at all levels
- Formulation and Evaluation of Claims

Procurement

PTL has extensive experience in:

- Invitations to Tender
- Evaluation of Tenders
- Negotiations with Contractors
- Contract placement and subsequent management
- Measurement of progress and performance.
- Formulating Procurement Plans

Project Control

PTL has extensive experience in:

- Estimating (Cost & Quantity)
- Progress Measurement and Reporting
- PERT Networks and Critical Path Analysis
- Risk Analysis
- Cost Control
- Claims Formulation/Evaluation

Software

Increasingly projects are managed and controlled through the use of complex software systems either on large 'big-iron' mainframe machines or Personal Computers. An essential skill for success as a planning engineering consultant is in his flexibility and ability to use these different products.

PTL has demonstrated this ability consistently over many years using a wide variety of computer products.

PTL can help you introduce, use and upgrade such software on mainframes, midrange computers or PCs.

Software used includes: Artemis 6000, Primavera P3, Primavera Montecarlo Risk Package, IBM PMS IV, IBM AS400 series, computers and software, Microsoft Project, Microsoft Excel 97, Primavera v2 and v3 for Windows, Suretrack, Lotus 123, Freelance Graphics, Timeline.

Clients

PTL Clients include: -

Air Products Ltd (UK)
Babcock (UK)
Badger Catalytic (UK)
Bechtel UK
Bechtel/Technip France
Biocompatibles (UK)
British Oxygen (Cryoplants Division) (UK)
British Oxygen
British Petroleum
Costain Fuel Subsea Engineering (UK)
John Brown Engineering & Construction (UK)
Kellogg Brown and Root (USA/UK)
London and Continental Engineering (UK)
Norsk Hydro (Norway)
Penspen Ltd (UK)
Rail link Engineering (UK)
Total Oil Marine (UK)
